Charles A. Hartman

Professional Experience

Co-creator, Software Engineer, Artemis *2*

- Designed, prototyped, and implemented Artemis, an open-source, serverless framework for scalable API load testing. Artemis is an easily deployable, cloud-based load testing framework that provides robust data retention and a clean, customizable dashboard to visualize near real-time results.
- Designed and built AWS infrastructure to generate a load of up to 20,000 virtual users.
- Engineered a solution for starting tests across load testing containers simultaneously.
- Built a CLI application using AWS CDK and SDK libraries to automate the deployment of Artemis' infrastructure and to allow users to create, configure, and launch their tests.
- Developed an admin dashboard to make Artemis' CLI functionality available through a graphical user interface using React.js and Express.
- Built a robust and easy-to-use CLI with Node.js and Commander.js and published it as an NPM package.
- Created custom Docker images for the load generation, data aggregation, and data visualization containers within Artemis' architecture.
- Collaborated with a remote team of engineers, including daily standups and pair programming.
- Presented a live tech talk about Artemis, viewable at https://artemis-load-testing.github.io/#presentation 🖉
- Authored a comprehensive technical case study describing the load testing problem domain and Artemis' technical design decisions, readable at https://artemis-load-testing.github.io/ 2

Software Engineer, Self-employed

Developed open-source applications with technologies such as Node.js, Express, Sinatra, React, Redux, SQL, HTML, CSS, Ruby, and JavaScript. Built numerous front-end, back-end and full-stack applications including:

- TortoiseBin A tool to inspect and debug webhook requests (Nginx, Express, PM2, PostgreSQL)
- Trellis A Trello-like kanban board for task tracking (MongoDB, Express, Node, React, Redux)
- Contact Manager A web application using the MVC design pattern (HTML, CSS, JavaScript)

Founder and Director, Charles A. Hartman Fine Art

- Sustained consistent growth in revenue, profit, and reputation for this successful art gallery.
- Led the development of the company's website, which was integral to ongoing sales and marketing efforts.
- Directed all sales, curatorial, and finance operations while building strong relationships with all stakeholders.

Skills

Back end Front end Cloud / AWS Tooling Node.js, Express, Ruby, JavaScript, React, Redux, Lambda, ECS, Farqate, AWS (CDK, SDK), Git, Golang, PostgreSQL, Handlebars.js, HTML, CSS S3, ECR, Timestream, GitHub, Docker, Linux, EC2, VPC, CloudWatch MongoDB, RESTful APIs Bash, Postman, Grafana, Digital Ocean, Heroku

Education

Software Engineering, Capstone Program, Launch School 🔗

Multi-year, mastery-based software engineering curriculum, with progression gated by written exams and live coding interviews to develop problem-solving and technical skills. (https://launchschool.com/employers @)

Bachelor of Arts, cum laude, Religious Studies, Kenyon College

1992

1996 – 2021

2022 – present

2018 – 2022

2022
